LED Variable Message Pannel

Arrival/Departure Summary Large Display

mod. TL10-02 (10 Lines + 2 Info + Clock) **mod.** TL08-01 (8 Lines + 2 Info + Clock)

Devices made in LED technology, are part of a line of devices for displaying information to travelers in public transportation applications.

The structure of the graphic panel LED makes these types of devices dedicated to display of summary information Arrival / departure of trains, planes, buses, etc.).

The devices have an area normally devoted to the graphic display of a date real time.

The performance of optical brightness, contrast and angle of vision allow to use them in indoors environments even under strong illumination from the outside.

The devices, thanks to the characteristics of the operating system and application software on board, are able to view any information screen so to allow the use of these in many different areas (web applications, etc..).

mod. TL10-02

mod. TL08-01

Configuration	TL10-02	TL08-01
LED		
Technology	AlInGaP	
Color	Yellow	
Diameter (mm)	4000	
Brightness	4	
Contrast	> 5	
CONSUMPTION		
Pmax (70% max brightness LED lit)	2,1 kW	1,9 kW
Pmed (typical use)	1,5 kW	1,3 kW
OVERALL		
Dimensions (mm)	3770 x 2100 x 175	3770 x 1871 x 175
WEIGHT		
Device (kg)	280	255
Bracket (kg)	47	45
PROTECTION		
Grade	IP32
