- Business
- Systems Division
- Plants Division

Company

- Sysco S.p.A. designs, manufactures and installs different types of products with different technologies.
- The Sysco S.p.A. is a company totally "customer oriented", having as its main purpose the satisfaction of the needs of the customer offering Standard or dedicated type solutions, providing a continuous support for the whole life cycle of installations.
- And is also engaged in the design, construction and maintenance of technological plants and rail safety.
- Sysco S.p.A., in the context of information systems to the public, through originality of the solutions adopted in its line of products, can be considered a national leader.

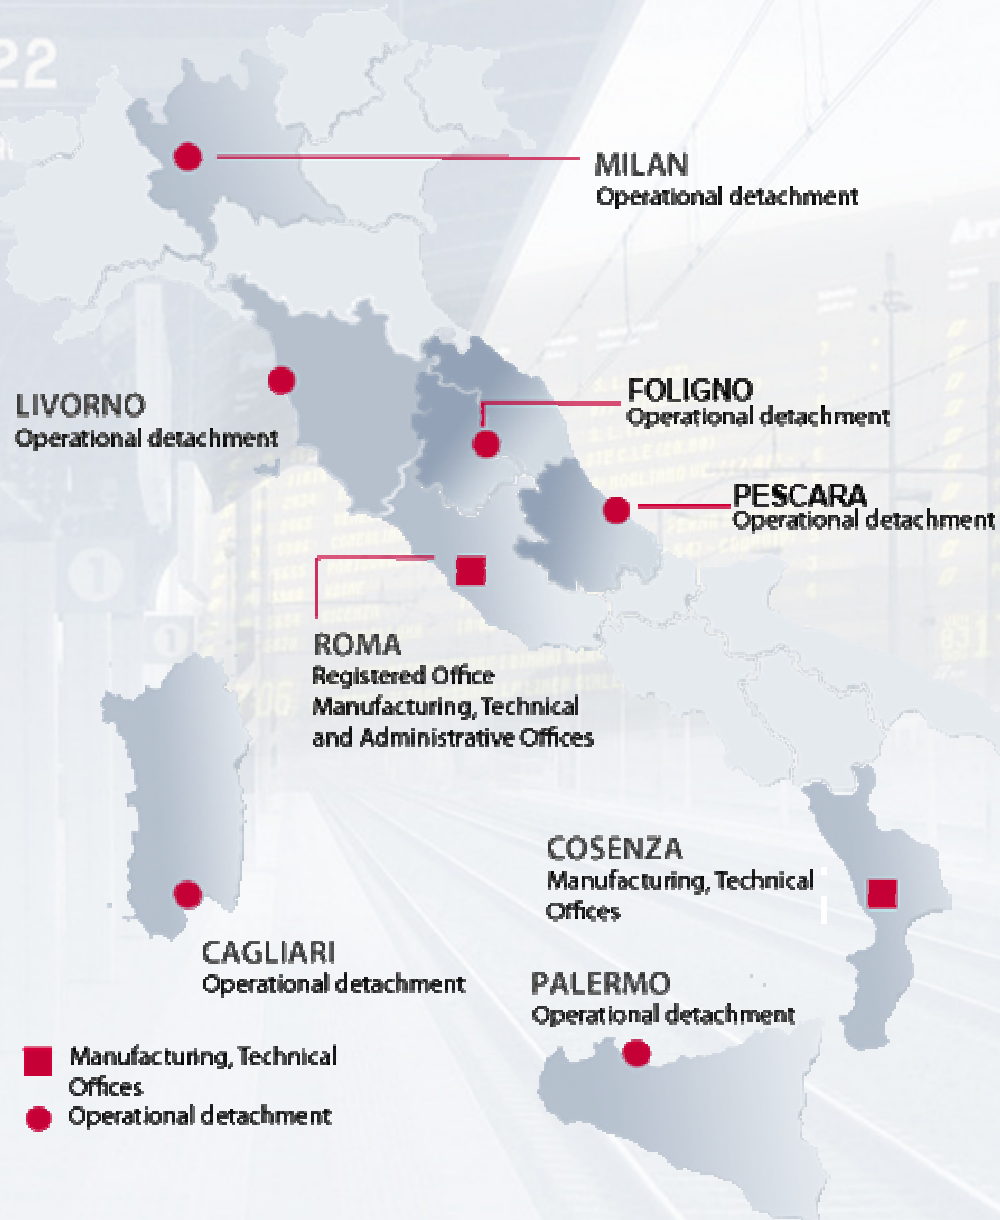

History

- Since 1978, date of Foundation, the SYSCO has pursued with successful project, development, installation and maintenance service of post-sale in the following market sectors:
 - **Information systems to the public in transport terminals as train stations and airports**
 - **Passenger services as reservation at a distance, Tickets and Self-Service Terminals Reservation**
 - **Design, construction and maintenance of local network (LAN) and structured wiring**
 - **Design, installation and maintenance of telecommunications equipment and optical fibres**
 - **Design, installation and maintenance of industrial electrical plants**
- A story made up of people who have passion and expertise with a global market in continuous evolution.

Certification

- **ISO 9001:2000 QUALITY CERTIFIED**
 - Certification obtained in 1996 and regularly audited by Det Norske Veritas (DNV)
- **PUBLIC WORKS**
 - Certificates of qualification SOA
- **RAILWAYS**
 - RFI LIS-006 Certification to work on the square of the Signaling and Security
 - RFI LTE-001 Certification implementation of cabins and electrical power substations
 - RFI LTE-002 Certification to work on the contact lines for electrical traction: new lines and substitution of contact lines
- **OTHER QUALIFICATIONS**
 - Authorization 1st degree of the Ministry of Telecommunications for the installation, testing, connection and maintenance of communication systems plants
 - Entitlement to, processing and maintenance of the plants referred to law n.46/90 (plant fire protection systems and electronic broadcasting in general, as heating and air conditioning)
- **FURTHER**
 - Enhancement of existing skills, to get higher classes
 - Acquiring new certifications (eg RFI LIS-002 for design and manufacturing ACEI plants)

References

- **INFORMATION SYSTEMS TO THE PUBLIC - IaP**
 - The company has done more than 200 information systems to the public in small, medium and large railway stations, distributed throughout the country, including several lines for non-attended stations.
 - Sysco has, till today, a total of about 2,000 last generation devices installed, with the use of more than 30,000,000 of LEDs.
- **REGION MAIN PLANTS**
 - **Lombardia** Milano Certosa, Milano Greco Pirelli, Milano Lambrate, Monza, Sesto S.Giovanni, Varese
 - **Veneto** Vicenza, Treviso, Belluno
 - **Lazio** Roma Trastevere, Tivoli, Orte, Formia, Frosinone, Sezze R.
 - **Sicilia** Palermo, Catania, Messina, Agrigento, Trapani, Ragusa, Enna
 - **Sardegna** Cagliari, Sassari, Oristano, Olbia, Macomer, Chilivani
 - **Calabria** Catanzaro Lido, Reggio C., Cosenza, Villa S.Giovanni, Paola, Crotona, Sibari
 - **Other region** Parma, Ventimiglia, Novara, Empoli, Siena, Avellino, Fidenza, Gorizia, Campobasso, Isernia, ecc.
- **TECHNOLOGICAL PLANTS**
 - Sysco has made for the last years maintenance services and construction of new technological plants for about 30 million of Euro.

Customers

- **Sysco customers:**
 - **Rete Ferroviaria Italiana (RFI)**
 - **Ferrovie Nord Milano (FNM)**
 - **Tele Sistemi Ferroviari (TSF)**
 - **Ferrovie della Calabria**
 - **Alstom**
 - **Bombardier**
 - **Ferrovie Centrali Umbre**
 - **Sielte**
 - **Ansaldo**

Business

- The products and services are directed to different typologies Business:
 - Industrial rail operators
 - Main contractor of plant engineering
 - Public institutions and private companies
- All the projects are carried out with and for the buyer. The goal is to provide a service tailor-responsive to specific customer requirements.
- **POTENTIAL BENEFICIARIES of supplies and services of Sysco group:**
 - 1. Railway network and railway granted;
 - 2. Transport companies, Metropolitan;
 - 3. Airports;
 - 4. Parking lots, roads and motorways (mobility);
 - 5. Port areas;
 - 6. Parks (work environment);
 - 7. Exhibitions;
 - 8. Stadiums, sports buildings (Sports);
 - 9. Major events;
 - 10. Other companies and government agencies.

INFORMATION SYSTEMS Area

- Systems Division is synonymous of design, production, installation and maintenance of various types of equipment for the information to the public.
- The constant attention given to the selection of materials, the continuous monitoring of IT scenarios, the frequent tests and trials allow us to offer clients a package with the best market standards in terms of safety, quality and reliability. The systems produced present design and creative solutions with the latest technology.
- The production deals with both hardware devices and management, analysis and monitoring software (including remote). The variety of products in the catalog is very broad. Systems Division is able, however, to study, develop and implement, within a suitable time, new equipment design and dedicated to specific respondents.
- Sysco design and produce display with LED and LCD/TFT technology. It installs and maintains various types of display information:
 - Monitor;
 - Boards;
 - Bands;
 - Kiosk;
 - City Information Sign;
 - Other (eg LED lighting).
- These devices may have the following applications:
 - public information;
 - advertisements;
 - lighting (LED lighting for buildings and tunnels, LED street lamps in the streets);
 - other.

TECHNOLOGICAL SYSTEMS

Area

- The activities of the Plants Division covers the following areas:
 - Design and construction of technological plants
 - Signaling systems (for automatic control of railway traffic) ACEI and PL
 - Telecommunications equipment
 - Street lighting
 - Sound diffusion plants
 - Video surveillance plants
 - Maintenance and Installations
 - Electrical traction
 - Signaling systems and security (ACEI, P.L.) (the italian name of the electronic interlockings)
 - Telephone systems, audio / video, data, information to the public
 - Electrical power and lighting (with light tower)
